The three main components of the home page are the rooms(center), topics bar(left), recent activities(right). Each room is created by a host and centered around a specific topic. When a room is created, it is added to the browse topics section. If a comment is made inside a room you're a part of, the recent activity will populate on the right. The top of the screen includes a search bar to easily browse as well as user info on the right.

This is the room view, once a user selects a room to join. The main component will be the messages within the room, displaying in chronological order. On the right, you will be able to see a list of all users who've joined the room.
